

ARTI BORAD

Senior Node.js Backend Developer

artiborad0812@gmail.com | +91 7874509801 | [GitHub](#) | [LinkedIn](#)

4+ years specializing in serverless AWS architectures, NestJS microservices, and real-time systems across logistics, real-estate, and e-commerce domains.

EXPERIENCE

SQUILLION TECH

2025 – Present

Senior Backend Developer

- Led backend for a logistics platform handling 10K+ daily shipments across 100+ RBAC users, achieving 99.9% uptime.

SCRIPTUS SOLUTIONS PVT. LTD

2022 – 2025

Backend Developer

- Built 15+ microservices in NestJS/AWS Lambda, cutting API response time by 25% and reducing infra costs by 20%.

CIPHERNUTZ IT SERVICES

2021 – 2022

Backend Developer

- Built 20+ REST APIs and automated 5 third-party integrations, saving 10 hrs/week in manual ops.

GLORY AUTOTECH

2020 – 2021

Backend Developer

- Built scalable backend APIs for automation and chatbot platforms, reducing manual task handling by 15% via scheduled jobs and notification pipelines.

NOTABLE PROJECTS

Gigalty (Real Estate Platform):

- Designed a serverless real-estate platform on AWS Lambda + API Gateway with WebSocket-based real-time chat, serving 1,000+ users at 40% lower backend costs.

Cellular Shock (Bulk Electronics):

- Engineered a high-throughput backend for a bulk electronics platform managing 50,000+ product listings, optimizing PostgreSQL queries and indexing to handle a 3x spike in transactions with sub-200ms response times.

Acumen (Vehicle Management):

- Built a multi-role vehicle lifecycle management system with granular RBAC (5+ roles), tracking vehicles from procurement to disposal and cutting processing time per vehicle by 2 hrs.

Distribution (Transport Platform):

- Built an event-driven consignment tracking system on real-time logistics APIs, delivering end-to-end shipment visibility across 500+ daily operations and cutting ops team query load by 40%.

EDUCATION

B.Tech in Computer Engineering | Uka Tarsadiya University | CGPA: 9.01

2019–2022

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Node.js, Express.js, NestJS, GraphQL, WebSockets

Cloud & Infrastructure: AWS (Lambda, S3, SNS, Cognito), Docker, Microservices, System Design, REST APIs

Databases & ORMs: MongoDB, PostgreSQL, MySQL, TypeORM

Tools & Methodologies: Git, Swagger, Postman, Jira, Puppeteer, RBAC, Authentication, API Optimization
